

We request that the City take immediate action to move mobile vaccination units into the geographical heart of areas with the highest percentage rates of infection and deaths. These units must be stationed in locations that are easily accessible by public transit, bicycles and on foot and working with community groups like the Glassell Park Improvement Association, Neighborhood Councils and other local organizations to make sure our neighbors know where and how to get vaccinated.

The Glassell Park Improvement Association (GPIA) is ready to help, in whatever ways are needed, including identifying locations within our community.

The Glassell Park Improvement Association, founded in 1968, is one of the oldest organizations of its kind in Los Angeles. Our founders described our mission as advocating for quality-of-life issues and working to improve conditions in Glassell Park. As such, our Board of Directors have voted and approved sending this statement on behalf of our members.
