

DRAFT

TO: councilmember Hernandez and others

There must be justice reform in the courtroom. Please coordinate changes with City attorney Hydee Feldstein Soto the following changes:

Anyone found not guilty will have an immediate filing of Factually Innocent and offered that at the time of any not guilty verdict.

Also more oversight of prosecutors to sure cases are not being maliciously prosecuted or cases prosecuted without merit.

We have too many criminal court cases where there are prosecutions without evidence. More supervision and oversight is needed of prosecutors.

Please coordinate changes in the Los Angeles City attorney's office.

Susan Rocha

To City Councilmembers

The noise law must change. LAMPC Chapter 11 Article 5 Section 115.02b mentions the words "except churches". This law is being used to give special treatment and protection to churches. It puts churches above the law.

Special treatment is given where the general public does not have the same privilege.

Also the law is vague and being misinterpreted by LAPD Noise Enforcement Team and LAPD.

The words "except churches " is discrimination in itself. It does not include any other religion other than just churches. However, there should be no exception for any religion. There are already court cases that have been settled about church noise. It is not a right.

Please remove the words "except churches " from the law.
